

ABSTRACT

Nia Budi Harti, NPM: 190102159. *"The Influence of Parenting Patterns on the Development of the Social Caring Character of the Fifth-Grade Students at SDN 1 Pengadangan 2022/2023 Academic Year."*

This study aims to examine the influence of parenting pattern on the development of students' social caring character. This research was conducted in the VA class with 21 students as respondents. This is a quantitative research with the *ex-post facto* research methods. The results of the analysis of the hypothesis test showed that there was an influence of parenting pattern on the development of social caring character of students by using the t-test formula with the testing criteria: if the value of $t_{count} > t_{table}$ at a significance level of 0.05 (5%) then there was an influence between variables X and Y. Based on the results of the hypothesis test, the effect of parenting style on the development of students' social caring character is $t_{count} = 12,143 > t_{table} 2.080$ at a significance level of 0.05. While the significance value on the effect of parenting style on the development of students' social caring character is $0.00 < 0.05$ (5%). Thus, it can be assumed that there is an influence of parenting style on the development of the social caring character of the fifth-grade students at SD Negeri 1 Pengadangan in 2022/2023 academic year.

Keywords: *Parenting Pattern, Social Care Character*
