The objective of this research is to develop Student Worksheets (LKPD) for *Pancasila* Education based on local wisdom, utilizing the *ADDIE* research design model comprising five stages: Analyze, Design, Develop, Implement, and Evaluate. The study was conducted with fourth-grade students, with 20 students participating as respondents. Research instruments and development utilized validation sheets and student response questionnaires. The validation results by subject matter experts yielded a total score of 64, falling within the range of scores ( $x > 58.74$ ) categorized as "very good". Validation by design experts resulted in a total score of 50, within the range of scores ( $44.2 < x < 54.6$ ) categorized as "good". Student responses to the usability of the *Pancasila* Education-based LKPD, developed from the questionnaire, obtained a score of 236, derived from the total "YES" points, with an overall component percentage reaching 90%, categorized as "good". The research shows that the Student Worksheets (LKPD) for *Pancasila* Education based on local wisdom are valid and effective teaching materials for use in schools.
