

ABSTRACT

Putri Emil Yana (2023), The Development of Student Worksheets (Lembar Kerja Peserta Didik – LKPD) in Mathematics Learning in the Merdeka Curriculum of 4th Grade at SDN 5 Sukarara. Thesis, Elementary School Teacher Education Study Program, FIP Department, Hamzanwadi University, 2023.

This research aims to provide a different and varied learning experience to stimulate students' interest in learning. It falls under the category of research and development. The development of Student Worksheets in this study follows the ADDIE development procedure (Yudi, 2020), which is simplified into four stages: (1) Analysis, (2) Media Design, (3) Development, and (4) Implementation. The instruments used in this research include a list of interview questions and a questionnaire. Interviews were conducted to analyze the needs of fourth-grade students at SDN 5 Sukarara, while the questionnaire was used to validate the content and media design and to gauge the responses of 31 students from SDN 5 Sukarara to the Student Worksheets. Based on the validation results, the scores obtained from the content expert amounted to 54.4, while those from the media expert reached 67.8. The average validation score is 4.4, categorized as "Good." Meanwhile, the product testing with 31 students from SDN 5 Sukarara yielded an average score of 52.64 and a percentage of 10.528%, categorized as "Highly Efficient."

Keywords: Student Worksheets Development, Discipline Character
