

ABSTRACT

Type of this research was quantitative research. The purpose of the quantitative approach in this study is to obtain research results expressed in numerical form, which is explained using statistical formulas. This research aims to determine the improvement of students' cooperation skills through group guidance services using traditional game techniques. Type of this study was Quasi-Experimental with a research design of One Group Pre-test and Post-test. Based on the data analysis using the t-test, it shows that the t-count is greater than the t-table ($6.375 > 2.365$) at a significance level of 5%, indicating that there is an influence of group guidance services with the traditional game technique "bakiak" in improving cooperation skills among students in class VIIIA at MTs Nurussalam Tetebatu. This indicates that H_a (the research hypothesis) is accepted and H_o is rejected.

Keywords: cooperation skills, group guidance, traditional game technique
