

ABSTRACT

Listiani: 190102153. "Development of Teaching Materials Based on Local Wisdom to Improve Beginning Reading Skills in Grade 1 Students of SDN 1 Pringgasela."

The aim of this research is to develop teaching materials to provide different and varied learning experiences to stimulate students' interest in learning. This research is a type of research and development. Development of Local Wisdom Teaching Materials for Early Reading uses the ADDIE development procedure (Sugiyono, 2022) which is simplified into 4 stages: (1) Analysis, (2) Media design, (3) Development, (4) Implementation (5) evaluation. The instrument in this research is a questionnaire. The questionnaire was used to validate the material and media design and to determine the response of 26 students of SDN 1 Pringgasela to the Beginning Reading Local Wisdom Teaching Materials. Based on validation results, the score obtained from material experts was 8.43 and media experts were 8. The average validation score was 4.4 in the "Good" category. Meanwhile, product trials on 26 students at SDN 1 Pringgasela obtained an average result of 15 in the "Very Efficient" category.

Keywords: Teaching Materials, Based on Local Wisdom, Beginning Reading
